

Lumsden Public Works

11/23/2010

Equipment:

- Unit 50 Grader: The tires on the grader are worn out and are being replaced

Landfill:

- The Landfill compactor has arrived and the landfill cleanup will hopefully be completed on Friday.
- Last week I attended landfill managers course in Saskatoon. I gained valuable information in the operation of landfills. I am currently looking into the set up and operation of a composting site and an alternative to burning shingles in a pit.
- The new permit to operate the landfill has arrived. The old permit expires Nov. 30 2010.

Drainage:

- Tom Williams from AE came out and looked at the spring on Cotton Wood place and is going to do up a cost estimate for a solution.

Roads & Sidewalks

- Snow removal has begun bringing an end to sidewalk and road repairs for the season.

Misc.:

- X Mas decorations should be going up the first couple days in December.
- The week of the 29th – 3rd we also plan on putting in the outdoor rink.
