

Lumsden Public Works

10/26/2010

Equipment:

- Unit 45 (Bobcat) had a problem with a right side drive motor witch had to be repaired and will be covered by warranty. A warning light was also installed while it was in for repairs.

Landfill:

- The Landfill compactor from Marcel Equipment will be shipped Wednesday the 27th and should be here on the 1st and landfill cleanup will begin as soon as it arrives.
- I would like to attend the land fill managers coarse that is going on in Saskatoon from Nov.15th to 18th.

Recycling

- We do currently have a drop off spot for batteries. At this time we do not collect florescent bulbs or Styrofoam, we need to look in to a safe way of collecting florescent bulbs and depending on the amount of Styrofoam at comes in space could be an issue at the recycle center.

Drainage:

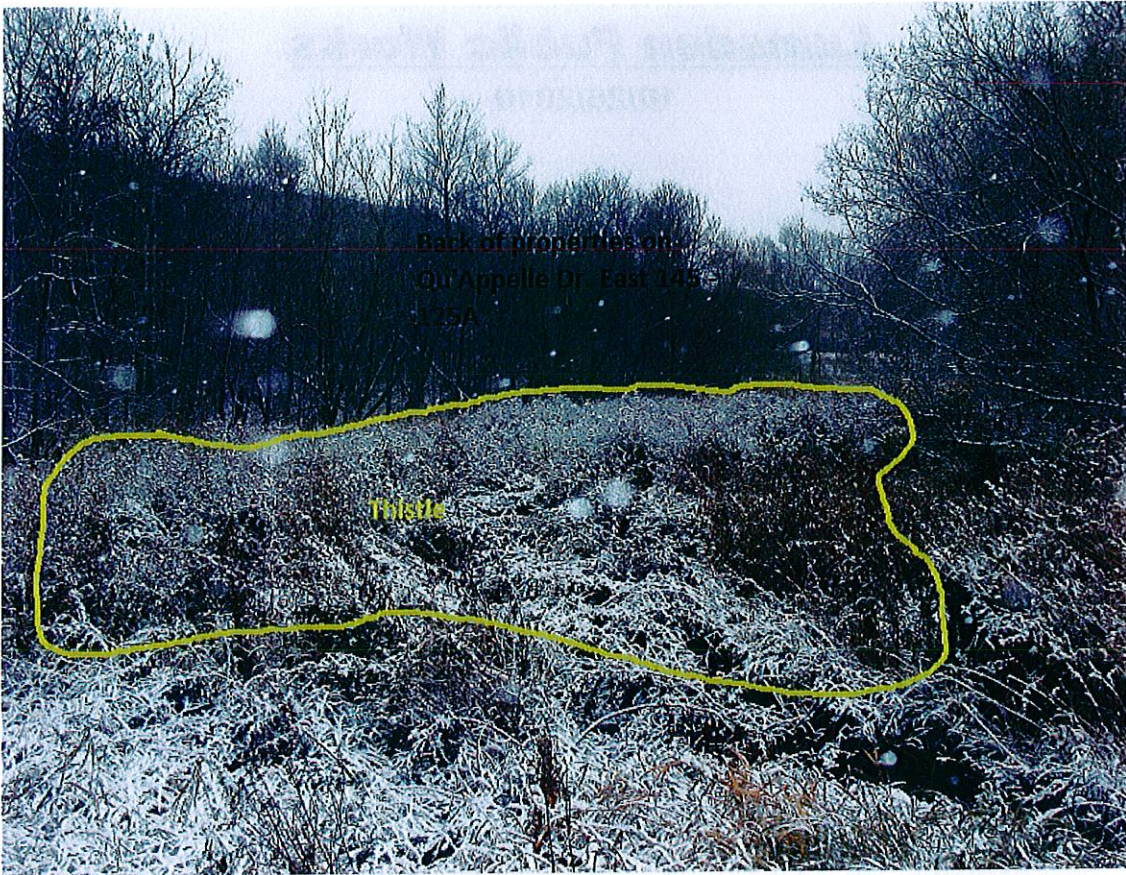

- We will be pumping River Park oxbow to gain more room for run off.

Roads & Sidewalks

- The last couple of week's sidewalk repairs and replacement has been going on James St. North and a wheel chair ramp at the campground shower house was installed.

Weeds:

- There is a fair amount of thistle at the back of the properties on Qu'Appelle Dr. east from 145 to 125A and a portion of the next lot. See picture
